

<b>TRADEMARK APPLICATIONS DAILY</b>
<b>XML DTD ELEMENT DOCUMENTATION (V2.0)</b>

XML Elements	Description
<trademark-applications-daily>	The <trademark-applications-daily> element is mandatory and will occur one time identifying the beginning of a daily application process. The trademark applications daily element will contain one occurrence of the version and data processed indicator elements, and zero or more occurrences of the file segments element between the <trademark-applications-daily> start and </trademark-applications-daily> end tags.
<version>	The <version> element is mandatory and will occur one time between the <version> start and </version> end tags identifying the version number and version date of the Trademark Applications DTD. The version element will contain one occurrence of the version number and version date elements.
<version-no>	The <version-no> element is mandatory and will occur one time between the <version-no> start and </version-no> end tags containing the version number of the Trademark Applications DTD. Example: the first production version will be 1.0
</version-no>	
<version-date>	The <version-date> element is mandatory and will occur one time between the <version-date> start and </version-date> end tags containing the date of the Trademark Applications DTD, an 8-position numeric in the format YYYYMMDD.
</version-date>	
</version>	

<b>APPLICATION INFORMATION SECTION</b>
--

XML Elements	Description
<application-information>	The <application-information> element is optional and will occur zero or one times between the <application-information> start and </application-information> end tags containing the daily trademark applications data.
<data-available-code>	The <data-available-code> element is optional and will occur zero or one times when trademark data is <b>NOT</b> present. The <data-available-code> start tag and the </data-available-code> end tag will be present and contain a one-position "N" indicating that trademark data is <b>Not</b> present. This element will not be present when data is available.
</data-available-code>	
<file-segments>	The <file-segments> element is optional and will occur zero or more times between the <file-segments> start and </file-segments> end tags identifying the beginning of the Trademark Applications file. The <file-segments> element will contain zero or more occurrences of the file segment and action keys elements.
<file-segment>	The <file-segment> element is optional and will occur zero or more times between the <file-segment> start and </file-segment> end tags containing the File Segment text data, a four-position alphabetic field identifying the type of data in the Trademark Daily XML Process. The Trademark Applications <file-segment> will always have a constant of "TRMK". The "TRMK" file segment contains new trademark data and modifications made to existing Trademark data.

<action-keys>	The <action-keys> element is optional and will occur zero or more times between the <action-keys> start and </action-keys> end tags. The action keys element will contain zero or more occurrences of the action key and case file elements.																																																																																														
<action-key>	<p>The &lt;action-key&gt; element is optional and will occur zero or more times between the &lt;action-key&gt; start and &lt;/action-key&gt; end tags containing the KEY ACTION, a two-position alphanumeric field. The contents of the action key will be one of the following values for marks appearing in the Trademark <i>Official Gazette</i> (OG).</p> <table border="1"> <thead> <tr> <th colspan="2" data-bbox="321 386 415 410"><u>Position</u></th><th data-bbox="611 386 709 410"><u>Category</u></th></tr> <tr> <th data-bbox="321 410 363 435">1<sup>st</sup></th><th data-bbox="415 410 457 435">2<sup>nd</sup></th><th></th></tr> </thead> <tbody> <tr><td>0</td><td>0</td><td>Published for Opposition</td></tr> <tr><td>1</td><td>0</td><td>Principal Register</td></tr> <tr><td>1</td><td>5</td><td>Principal Register - Published Intent to Use</td></tr> <tr><td>2</td><td>0</td><td>Supplemental Register</td></tr> <tr><td>3</td><td>0</td><td>Section 12(c)</td></tr> <tr><td>4</td><td>1</td><td>1<sup>st</sup> Renewal</td></tr> <tr><td>4</td><td>2</td><td>2<sup>nd</sup> Renewal</td></tr> <tr><td>4</td><td>3</td><td>3<sup>rd</sup> Renewal</td></tr> <tr><td>4</td><td>4</td><td>4<sup>th</sup> Renewal</td></tr> <tr><td>4</td><td>5</td><td>5<sup>th</sup> Renewal</td></tr> <tr><td>4</td><td>6</td><td>6<sup>th</sup> Renewal</td></tr> <tr><td>5</td><td>1</td><td>Cancelled Sec. 7(d) - Entire Registration</td></tr> <tr><td>5</td><td>2</td><td>Cancelled Sec. 7(d) - Less than Total Classes</td></tr> <tr><td>5</td><td>3</td><td>Cancelled Sec. 8 - Entire Registration</td></tr> <tr><td>5</td><td>4</td><td>Cancelled Sec. 8 - Less than Total Classes</td></tr> <tr><td>6</td><td>1</td><td>Cancelled Sec. 37 - Entire Registration</td></tr> <tr><td>6</td><td>2</td><td>Cancelled Sec. 37 - Less than Total Classes</td></tr> <tr><td>6</td><td>3</td><td>Cancelled Sec. 18 - Entire Registration</td></tr> <tr><td>6</td><td>4</td><td>Cancelled Sec. 18 - Less than Total Classes</td></tr> <tr><td>6</td><td>5</td><td>Cancelled Sec. 24 - Entire Registration</td></tr> <tr><td>6</td><td>6</td><td>Cancelled Sec. 24 - Less than Total Classes</td></tr> <tr><td>6</td><td>7</td><td>Inadvertently Issued Registration Number</td></tr> <tr><td>7</td><td>0</td><td>Amended</td></tr> <tr><td>7</td><td>1</td><td>Restricted</td></tr> <tr><td>8</td><td>0</td><td>Corrected</td></tr> <tr><td>9</td><td>0</td><td>New Certificate</td></tr> <tr><td>I</td><td>B</td><td>“IB” for Marks that are used as a basis for filing a Madrid International Request</td></tr> <tr><td>N</td><td>A</td><td>“NA” for New Applications filed (an “NA” Action Key will not appear in the OG)</td></tr> <tr><td>T</td><td>X</td><td>“TX” for Marks that have been modified (a “TX” Action Key will not appear in the OG)</td></tr> </tbody> </table>		<u>Position</u>		<u>Category</u>	1 <sup>st</sup>	2 <sup>nd</sup>		0	0	Published for Opposition	1	0	Principal Register	1	5	Principal Register - Published Intent to Use	2	0	Supplemental Register	3	0	Section 12(c)	4	1	1 <sup>st</sup> Renewal	4	2	2 <sup>nd</sup> Renewal	4	3	3 <sup>rd</sup> Renewal	4	4	4 <sup>th</sup> Renewal	4	5	5 <sup>th</sup> Renewal	4	6	6 <sup>th</sup> Renewal	5	1	Cancelled Sec. 7(d) - Entire Registration	5	2	Cancelled Sec. 7(d) - Less than Total Classes	5	3	Cancelled Sec. 8 - Entire Registration	5	4	Cancelled Sec. 8 - Less than Total Classes	6	1	Cancelled Sec. 37 - Entire Registration	6	2	Cancelled Sec. 37 - Less than Total Classes	6	3	Cancelled Sec. 18 - Entire Registration	6	4	Cancelled Sec. 18 - Less than Total Classes	6	5	Cancelled Sec. 24 - Entire Registration	6	6	Cancelled Sec. 24 - Less than Total Classes	6	7	Inadvertently Issued Registration Number	7	0	Amended	7	1	Restricted	8	0	Corrected	9	0	New Certificate	I	B	“IB” for Marks that are used as a basis for filing a Madrid International Request	N	A	“NA” for New Applications filed (an “NA” Action Key will not appear in the OG)	T	X	“TX” for Marks that have been modified (a “TX” Action Key will not appear in the OG)

</serial-number>																	
<registration-number>	<p>The &lt;registration-number&gt; element is optional and will occur zero or one times between the &lt;registration-number&gt; start and &lt;/registration-number&gt; end tags containing the REGISTRATION NUMBER, a seven-position numeric field right justified with leading zeros. <b>NOTE:</b> If a mark does not contain a registration number, the &lt;registration number&gt; element will contain zeros.</p>																
</registration-number>																	
<transaction-date>	<p>The &lt;transaction-date&gt; element is optional and will occur zero or one times between the &lt;transaction-date&gt; start and &lt;/transaction-date&gt; end tags containing the TRANSACTION DATE, an eight position date in the format YYYYMMDD. The transaction date is the date of the Trademark Daily XML Process for Action Key entries.</p>																
</transaction-date>																	

CASE FILE HEADER SECTION	
XML Elements	Description
<case-file-header>	The <case-file-header> element is optional and occurs zero or one times between the <case-file-header> start and </case-file-header> end tags identifying the first record sequence of a trademark application document, which contains the equivalent of a TWTF/GENX record. Each case file header element will contain the following optional elements. <b>NOTE:</b> Any of the following elements that do not have the required date will contain zeros.
<filing-date>	The <filing-date> element is optional and occurs zero or one times between the <filing-date> start and </filing-date> end tags containing the FILING DATE, an eight position date in the format YYYYMMDD, which is the date on which a statutorily complete trademark application is filed at the USPTO.
</filing-date>	
<registration-date>	The <registration-date> element is optional and occurs zero or one times between the <registration-date> start and </registration-date> end tags containing the REGISTRATION DATE, an eight-position date in the format YYYYMMDD that identifies the date the mark was registered.
</registration-date>	
<status-code>	The <status-code> element is optional and occurs zero or one times between the <status-code> start and </status-code> end tags containing the STATUS CODE, a three position numeric field which identifies the status of the mark. Reference Table 1 Trademark Status Codes for the list of status codes.
</status-code>	
<status-date>	The <status-date> element is optional and occurs zero or one times between the <status-date> start and </status-date> end tags containing the STATUS DATE, an eight-position date in the format YYYYMMDD, which is the date on which the current status was reported to the system.
</status-date>	
<mark-identification>	The <mark-identification> element is optional and occurs zero or one times between the <mark-identification> start and </mark-identification> end tags containing the MARK-1-LIN, a variable length alphanumeric field containing the characters of the actual mark.
</mark-identification>

<cancellation-date>	The <cancellation-date> element is optional and occurs zero or one times between the <cancellation-date> start and </cancellation-date> end tags containing the CANCELLATION DATE, an eight-position date in the format YYYYMMDD, which is the date that the cancellation of the entire registration was recorded.																												
</cancellation-date>																													

CASE FILE HEADER SECTION	
XML Elements	Description
<republished-12c-date>	The <republished-12c-date> element is optional and occurs zero or one times between the <republished-12c-date> start and </republished-12c-date> end tags containing the DATE PUBLISHED UNDER SECTION 12(C), an eight-position date in the format YYYYMMDD, which is the date of publication under Section 12(c).
</republished-12c-date>	
<domestic-representative-name>	The <domestic-representative-name> element is optional and occurs zero or one times between the <domestic-representative-name> start and </domestic-representative-name> end tags and contains the DOMESTIC REPRESENTATIVE information for the application.
</domestic-representative-name>	
<attorney-docket-number>	The <attorney-docket-number> element is optional and occurs zero or one times between the <attorney-docket-number> start and </attorney-docket-number> end tags containing the ATTORNEY DOCKET NUMBER, a twelve-position number containing the reference or identification number of a case as assigned and used in the office of the attorney filing the application.
</attorney-docket-number>	
<attorney-name>	The <attorney-name> element is optional and occurs zero or one times between the <attorney-name> start and </attorney-name> end tags and contains the ATTORNEY information from the OWNX record.
</attorney-name>	
<principal-register-amended-in>	The <principal-register-amended-indicator> element is optional and occurs zero or one times between the <principal-register-amended-in> start and </principal-register-amended-in> end tags containing the FLAG AMENDED TO THE PRINCIPAL REGISTER, a one-position alphabetic indicating the register has been amended for an application on the Supplemental Register. A "T" in this field indicates an amendment to the Principal Register. An "F" in this field indicates no amendment to the Principal Register.
</principal-register-amended-in>	
<supplemental-register-amended-in>	The <supplemental-register-amended-indicator> element is optional and occurs zero or one times between the <supplemental-register-amended-in> start and </supplemental-register-amended-in> end tags containing the FLAG AMENDED TO THE SUPPLEMENTAL REGISTER, a one-position field indicating the register has been amended for an application on the Principal Register. A "T" in this field indicates an amendment to the Supplemental Register. An "F" in this field indicates no amendment to the supplemental Register.
</supplemental-register-amended-in>	
	<b>The following six (6) MARK TYPE indicator elements contain a one-position field indicating the type of mark. The &lt;certification-mark-indicator&gt; is the only mark type that must appear alone. One or more of the other five (5) MARK TYPES may be applied to the same mark. If a MARK TYPE is not entered for a mark, the field will contain a "F"</b>
<trademark-in>	1) The <trademark-indicator> element is optional and occurs zero or one times between the <trademark-in> start and </trademark-in> end tags containing FLAG TRADEMARK, a one-position field indicating the type of mark. A "T" indicates a mark used as a Trademark.
</trademark-in>	

CASE FILE HEADER SECTION	
XML Elements	Description
<collective-trademark-in>	2) The <collective-trademark-indicator> element is optional and occurs zero or one times between the <collective-trademark-in> start and </collective-trademark-in> end tags containing FLAG COLLECTIVE TRADEMARK, a one-position field indicating the type of mark. A "T" indicates a mark used as a Collective Trademark.
</collective-trademark-in>	
<service-mark-in>	3) The <service-mark-indicator> element is optional and occurs zero or one times between the <service-mark-in> start and </service-mark-in> end tags containing FLAG SERVICE MARK, a one-position field indicating the type of mark. A "T" indicates a mark used as a Service Mark.
</service-mark-in>	
<collective-service-mark-in>	4) The <collective-service-mark-indicator> element is optional and occurs zero or one times between the <collective-service-mark-in> start and </collective-service-mark-in> end tags containing FLAG COLLECTIVE SERVICE MARK, a one-position field indicating the type of mark. A "T" indicates a mark used as a Collective Service Mark.
</collective-service-mark-in>	
<collective-membership-mark-in>	5) The <collective-membership-mark-indicator> element is optional and occurs zero or one times between the <collective-membership-mark-in> start and </collective-membership-mark-in> end tags containing FLAG COLLECTIVE MEMBERSHIP MARK, a one-position field indicating the type of mark. A "T" indicates a mark used as a Collective Membership Mark.
</collective-membership-mark-in>	
<certification-mark-in>	6) The <certification-mark-indicator> element is optional and occurs zero or one times between the <certification-mark-in> start and </certification-mark-in> end tags containing FLAG CERTIFICATION-MARK, a one-position field indicating the type of mark. A "T" indicates a mark used as a Certification Mark.
</certification-mark-in>	
<cancellation-pending-in>	The <cancellation-pending-indicator> element is optional and occurs zero or one times between the <cancellation-pending-in> start and </cancellation-pending-in> end tags containing FLAG CANCEL PENDING, a one-position alphabetic field. A "T" indicates that a cancellation proceeding is pending for this registration. Otherwise, this field will contain an "F".
</cancellation-pending-in>	
<published-concurrent-in>	The <published-concurrent-indicator> element is optional and occurs zero or one times between the <published-concurrent-in> start and </published-concurrent-in> end tags containing FLAG PUBLISHED CONCURRENT, a one-position alphabetic field. A "T" in this field identifies that the mark published subject to concurrent use. Otherwise, this field will contain an "F".
</published-concurrent-in>	
<concurrent-use-in>	The <concurrent-use-indicator> element is optional and occurs zero or one times between the <concurrent-use-in> start and </concurrent-use-in> end tags containing FLAG CONCURRENT USE, a one-position alphabetic field. A "T" in this field identifies the mark is subject to Concurrent Use. An "F" indicates no concurrent use. If present, the concurrent use statement should appear in the <case-file-statement> element
</concurrent-use-in>	

CASE FILE HEADER SECTION	
XML Elements	Description
<concurrent-use-proceeding-in>	The <concurrent-use-proceeding-indicator> element is optional and occurs zero or one times between the <concurrent-use-proceeding-in> start and </concurrent-use-proceeding-in> end tags containing the FLAG CONCURRENT USE PROCEEDING, a one-position alphabetic. A "T" in this field indicates that a concurrent use proceeding is pending before the Trademark Trial and Appeal Board (TTAB). An "F" indicates that no concurrent use proceeding is pending.
</concurrent-use-proceeding-in>	
<interference-pending-in>	The <interference-pending-indicator> element is optional and occurs zero or one times between the <interference-pending-in> start and </interference-pending-in> end tags containing the FLAG INTERFERENCE PENDING, a one-position alphabetic. A "T" in this field indicates that the application is involved in an interference proceeding pending before the Trademark Trial and Appeal Board. Otherwise, this field will contain an "F".
</interference-pending-in>	
<opposition-pending-in>	The <opposition-pending-indicator> element is optional and occurs zero or one times between the <opposition-pending-in> start and </opposition-pending-in> end tags containing the FLAG OPPOSITION PENDING, a one-position alphabetic. A "T" in this field indicates that an opposition proceeding is pending on this application. Otherwise, this field will contain an "F".
</opposition-pending-in>	
<section-12c-in>	The <section-12c-indicator> element is optional and occurs zero or one times between the <section-12c-in> start and </section-12c-in> end tags containing the FLAG REPUBLISH SECTION 12C, a one-position alphabetic field. A "T" in this field indicates that the mark is to be republished under section 12(C). Otherwise, this field will contain an "F".
</section-12c-in>	
<section-2f-in>	The <section-2f-indicator> element is optional and occurs zero or one times between the <section-2f-in> start and </section-2f-in> end tags containing the FLAG SECTION 2(F), a one-position alphabetic Special Entry Code. A "T" indicates a special entry for Section 2(f). Otherwise, this field will contain an "F".
</section-2f-in>	
<section-2f-in-part-in>	The <section-2f-in-part-indicator> element is optional and occurs zero or one times between the <section-2f-in-part-in> start and </section-2f-in-part-in> end tags containing FLAG SECTION 2(F) IN PART, a one-position alphabetic field. A "T" indicates a special entry for Section 2(f) as to part of the mark. Otherwise, this field will contain an "F".
</section-2f-in-part-in>	
<renewal-filed-in>	The <renewal-filed-indicator> element is optional and occurs zero or one times between the <renewal-filed-in> start and </renewal-filed-in> end tags containing the FLAG RENEWAL FILED, a one-position alphabetic field. A "T" indicates that a renewal application has been filed for this registration. Otherwise, this field will contain an "F".
</renewal-filed-in>	
<section-8-filed-in>	The <section-8-filed-indicator> element is optional and occurs zero or one times between the <section-8-filed-in> start and </section-8-filed-in> end tags containing the FLAG SECTION 8 FILED, a one-position alphabetic field. A "T" indicates that a Section 8 affidavit was filed for this registration. Otherwise, this field will contain an "F".
</section-8-filed-in>	

CASE FILE HEADER SECTION	
XML Elements	Description
<section-8-partial-accept-in>	The <section-8-partial-accept-indicator> element is optional and occurs zero or one times between the <section-8-partial-accept-in> start and </section-8-partial-accept-in> end tags containing the FLAG SECTION 8 PARTIAL ACCEPT, a one position alphabetic field. A "T" indicates that a Section 8 affidavit has been filed and was partially accepted. Otherwise, this field will contain an "F".
</section-8-partial-accept-in>	
<section-8-accepted-in>	The <section-8-accepted-indicator> element is optional and occurs zero or one times between the <section-8-accepted-in> start and </section-8-accepted-in> end tags containing FLAG SECTION 8 ACCEPTED, a one-position alphabetic field. A "T" indicates that a Section 8 affidavit has been filed and acknowledged for this registration. Otherwise, this field will contain an "F".
</section-8-accepted-in>	
<section-15-acknowledged-in>	The <section-15-acknowledged-indicator> element is optional and occurs zero or one times between the <section-15-acknowledged-in> start and </section-15-acknowledged-in> end tags containing FLAG SECTION 15 ACKNOWLEDGED, a one-position alphabetic field. A "T" indicates that a Section 15 affidavit has been filed and acknowledged for this registration. Otherwise, this field will contain an "F".
</section-15-acknowledged-in>	
<section-15-filed-in>	The <section-15-filed-indicator> element is optional and occurs zero or one times between the <section-15-filed-in> start and </section-15-filed-in> end tags containing the FLAG SECTION 15 FILED, a one position alphabetic field. A "T" indicates that a Section 15 affidavit has been filed for this registration. Otherwise, this field will contain an "F".
</section-15-filed-in>	
<supplemental-register-in>	The <supplemental-register-indicator> element is optional and occurs zero or one times between the <supplemental-register-in> start and </supplemental-register-in> end tags containing the FLAG SUPPLEMENTAL REGISTER, a one-position alphabetic field. A "T" indicates that the mark is, or will be, registered on the Supplemental Register. Otherwise, this field will contain an "F".
</supplemental-register-in>	
<foreign-priority-in>	The <foreign-priority-indicator> element is optional and occurs zero or one times between the <foreign-priority-in> start and </foreign-priority-in> end tags containing the FLAG FOREIGN PRIORITY CLAIMED, a one-position alphabetic field. This field will contain a "T" if the application/registration contains foreign application information and a right of priority has been claimed under section 44(d). Otherwise this field will contain an "F".
</foreign-priority-in>	
<change-registration-in>	The <change-registration-indicator> element is optional and occurs zero or one times between the <change-registration-in> start and </change-registration-in> end tags containing the FLAG CHANGE REGISTRATION, a one-position alphabetic field. This field will contain a "T" if any of the following has occurred to the registration: an amendment, a certificate of correction, less goods, less classes. If none of the actions listed above has occurred for a registration, this field will contain an "F".
</change-registration-in>	
<intent-to-use-in>	The <intent-to-use-indicator> element is optional and occurs zero or one times between the <intent-to-use-in> start and </intent-to-use-in> end tags containing the FLAG INTENT USE FILE, a one position alphabetic field. A "T" in this field indicates that the case was originally filed as an Intent to Use application. Otherwise, this field will contain an "F".

CASE FILE HEADER SECTION	
XML Elements	Description
</intent-to-use-in>	
<intent-to-use-current-in>	The <intent-to-use-current-indicator> element is optional and occurs zero or one times between the <intent-to-use-current-in> start and </intent-to-use-current-in> end tags containing the FLAG INTENT USE CURRENT, a one position alphabetic field. A "T" in this field indicates that this application still is an Intent to Use case for which a use amendment or statement has not yet been accepted. Otherwise, this field will contain an "F".
</intent-to-use-current-in>	
<filed-as-use-application-in>	The <filed-as-use-application-indicator> element is optional and occurs zero or one times between the <filed-as-use-application-in> start and </filed-as-use-application-in> end tags containing the FLAG FILED AS USE APPLICATION, a one position alphabetic field. A "T" indicates, at the time of initial filing, this application contained a claim based on use under Sec. 1(a).
</filed-as-use-application-in>	
<amended-to-use-application-in>	The <amended-to-use-application-indicator> element is optional and occurs zero or one times between the <amended-to-use-application-in> start and </amended-to-use-application-in> end tags containing the FLAG AMENDED TO USE APPLICATION a one position alphabetic field. A "T" indicates this application was amended to add a claim based on use under Sec. 1(a).
</amended-to-use-application-in>	
<use-application-currently-in>	The <use-application-currently-indicator> element is optional and occurs zero or one times between the <use-application-currently-in> start and </use-application-currently-in> end tags containing the FLAG USE APPLICATION CURRENTLY, a one position alphabetic field. A "T" indicates, at the present time, this application contains a claim based on use under Sec. 1(a) and/or that a Sec. 1(b) intent to use claim was perfected to claim use.
</use-application-currently-in>	
<amended-to-itu-application-in>	The <amended-to-itu-application-indicator> element is optional and occurs zero or one times between the <amended-to-itu-application-in> start and </amended-to-itu-application-in> end tags containing the FLAG AMENDED TO ITU APPLICATION, a one position alphabetic field. A "T" indicates this application was amended to add a claim based on intent to use under Sec. 1(b).
</amended-to-itu-application-in>	
<filing-basis-filed-as-44d-in>	The <filing-basis-filed-as-44d-indicator> element is optional and occurs zero or one times between the <filing-basis-filed-as-44d-in> start and </filing-basis-filed-as-44d-in> end tags containing the FLAG FILED AS 44(D) APPLICATION, a one position alphabetic field. A "T" indicates, at the time of initial filing, this Application contained a claim based on foreign filing priority under Sec. 44(d).
</filing-basis-filed-as-44d-in>	
<amended-to-44d-application-in>	The <amended-to-44d-application-indicator> element is optional and occurs zero or one times between the <amended-to-44d-application-in> start and </amended-to-44d-application-in> end tags containing the FLAG AMENDED TO 44(D) APPLICATION, a one position alphabetic field. A "T" indicates this application was amended to add a claim based on a foreign filing priority under Sec. 44(d).
</amended-to-44d-application-in>	

CASE FILE HEADER SECTION

<filing-basis-current-44d-in>	The <filing-basis-current-44d-indicator> element is optional and occurs zero or one times between the <filing-basis-current-44d-in> start and </filing-basis-current-44d-in> end tags containing the FLAG 44(D) APPLICATION CURRENTLY, a one position alphabetic field. A "T" indicates, at present time, this application contains a claim based on foreign filing priority under Sec. 44(d).
</filing-basis-current-44d-in>	
<filing-basis-filed-as-44e-in>	The <filing-basis-filed-as-44e-indicator> element is optional and occurs zero or one times between the <filing-basis-filed-as-44e-in> start and </filing-basis-filed-as-44e-in> end tags containing the FLAG FILED AS 44(E) APPLICATION, a one position alphabetic field. A "T" indicates, at the time of initial filing, this application contained a claim based on a live foreign registration under Sec. 44(e).
</filing-basis-filed-as-44e-in>	
<amended-to-44e-application-in>	The <amended-to-44e-application-indicator> element is optional and occurs zero or one times between the <amended-to-44e-application-in> start and </amended-to-44e-application-in> end tags containing the FLAG AMENDED TO 44(E) APPLICATION, a one position alphabetic field. A "T" indicates this application was amended to add a claim based on a live foreign registration under Sec. 44(e).
</amended-to-44e-application-in>	
<filing-basis-current-44e-in>	The <filing-basis-current-44e-indicator> element is optional and occurs zero or one times between the <filing-basis-current-44e-in> start and </filing-basis-current-44e-in> end tags containing the FLAG 44(E) APPLICATION CURRENTLY, a one position alphabetic field. A "T" indicates, at the present time, this application contains a claim based on a live foreign registration under Sec. 44(e) and/or that a sec. 44(d) priority claim was perfected by filing a foreign registration certificate.
</filing-basis-current-44e-in>	
<without-basis-currently-in>	The <without-basis-currently-indicator> element is optional and occurs zero or one times between the <without-basis-currently-in> start and </without-basis-currently-in> end tags containing the FLAG FILED WITHOUT BASIS, a one position alphabetic field. A "T" indicates, at the time of initial filing, this application contained no basis claim.
</without-basis-currently-in>	
<filing-current-no-basis-in>	The <filing-current-no-basis-indicator> element is optional and occurs zero or one times between the <filing-current-no-basis-in> start and </filing-current-no-basis-in> end tags containing the FLAG WITHOUT BASIS CURRENTLY, a one position alphabetic field. A "T" indicates, at the present time, this application contains no basis claim.
</filing-current-no-basis-in>	
<color-drawing-filed-in>	The <color-drawing-filed-indicator> element is optional and occurs zero or one times between the <color-drawing-filed-in> start and </color-drawing-filed-in> end tags containing the FLAG FILED WITH COLOR DRAWING, a one position alphabetic field. A "T" indicates whether, at the time of initial filing, this application contained a color drawing.
</color-drawing-filed-in>	
<color-drawing-currently-in>	The <color-drawing-currently-indicator> element is optional and occurs zero or one times between the <color-drawing-currently-in> start and </color-drawing-currently-in> end tags containing the FLAG COLOR DRAWING CURRENTLY, a one position alphabetic field. A "T" indicates whether, at the present time, this application contains a color drawing.

CASE FILE HEADER SECTION	
XML Elements	Description
</color-drawing-currently-in>	
<drawing-3d-filed-in>	The <drawing-3d-filed-indicator> element is optional and occurs zero or one times between the <drawing-3d-filed-in> start and </drawing-3d-filed-in> end tags containing the FLAG FILED WITH 3-D DRAWING, a one position alphabetic field. A "T" indicates whether, at the time of initial filing, this application contained a three-dimensional drawing with multiple views.
</drawing-3d-filed-in>	
<drawing-3d-current-in>	The <drawing-3d-current-indicator> element is optional and occurs zero or one times between the <drawing-3d current-in> start and </drawing-3d-current-in> end tags containing the FLAG 3-D DRAWING CURRENTLY, a one position alphabetic field. A "T" indicates whether, at the present time, this application contains a three-dimensional drawing with multiple views.
</drawing-3d-current-in>	
<standard-characters-claimed-in>	The <standard-characters-claimed-in> element is optional and occurs zero or one times between the <standard-characters-claimed-in>>start and </<standard-characters-claimed-in>> end tags and contains a one position alphabetic field. A "T" indicates that a claim of standard characters was made by the applicant and a "F" indicates no claim of standard characters has been made.
</standard-characters-claimed-in>	
<filing-basis-filed-as-66a-in>	The <filing-basis-filed-as-66a-indicator> element is optional and occurs zero or one times between the <filing-basis-filed-as-66a-indicator>start and </filing-basis-filed-as-66a-in> end tags containing the FLAG 66(A) APPLICATION FILED AS, a one position alphabetic field. A "T" indicates this application contains a Request for Extension of Protection in the US under Sec. 66(a).
</filing-basis-filed-as-66a-in>	
<filing-basis-current-66a-in>	The <filing-basis-current-66a-in> element is optional and occurs zero or one times between the <filing-basis-current-66a-in>start and <filing-basis-current-66a-in> end tags containing the FLAG 66(A) APPLICATION CURRENTLY, a one position alphabetic field. A "T" indicates, at the present time, this application contains a Request for Extension in the US under Sec. 66(a).
</filing-basis-current--66a-in>	
<renewal-date>	The <renewal date> element is optional and occurs zero or one times between the <renewal-date> start and </renewal-date> end tags containing the RENEWAL DATE, an eight position date in the format YYYYMMDD. This field Contains the date the mark was renewed. If the date is before November 16, 1989, the renewal is for 20 years; if the date is after November 15, 1989, the renewal is for 10 years.
</renewal-date>

## CASE FILE EVENT STATEMENTS SECTION

XML Elements	Description																				
<case-file-event-statements>	The <case-file-event-statements> element is optional and occurs zero or one times between the <case-file-event-statements> start and </case-file-event-statements> end tags, which contains the equivalent of a TWTF/EVNT record. Each case file event statements element will contain the optional case-file-event statement element.																				
<case-file-event-statement>	The <case-file-event-statement> element is optional and occurs one or more times between the <case-file-event-statement> start and </case-file-event-statement> end tags. When present, each case file event statement element will contain the following optional elements.																				
<code>	The <code> element is optional and will occur zero or one times between the <code> start and </code> end tags containing the EVENT CODE, a four-position alphanumeric field that represents an event in the prosecution of a case (paper entered, communications, petitions, etc.) For a list of values, please refer to Table 5 – Prosecution History Event Code List.																				
</code>																					
<type>	<p>The &lt;type&gt; element is optional and will occur zero or one times between the &lt;type&gt; start and &lt;/type&gt; end tags containing the EVENT TYPE, a one-position alphanumeric field that represents the detail information or entry code references. The entry type codes are as follows.</p> <table> <tr> <th>Entry Type</th><th>Description</th></tr> <tr> <td>A</td><td>Allowance for Publication</td></tr> <tr> <td>D</td><td>Assigned to Examiner</td></tr> <tr> <td>F</td><td>First Action</td></tr> <tr> <td>I</td><td>Incoming Correspondence</td></tr> <tr> <td>O</td><td>Outgoing Correspondence</td></tr> <tr> <td>R</td><td>Renewal</td></tr> <tr> <td>T</td><td>TTAB Proceeding</td></tr> <tr> <td>X</td><td>Correction</td></tr> <tr> <td>Z</td><td>Deletion</td></tr> </table>	Entry Type	Description	A	Allowance for Publication	D	Assigned to Examiner	F	First Action	I	Incoming Correspondence	O	Outgoing Correspondence	R	Renewal	T	TTAB Proceeding	X	Correction	Z	Deletion
Entry Type	Description																				
A	Allowance for Publication																				
D	Assigned to Examiner																				
F	First Action																				
I	Incoming Correspondence																				
O	Outgoing Correspondence																				
R	Renewal																				
T	TTAB Proceeding																				
X	Correction																				
Z	Deletion																				
</type>																					
<description-text>	The <description-text> element is optional and will occur zero or one times between the <description-text> start and </description-text> end tags containing the EVENT DESCRIPTION, a sixty-five position character field, which is the description of the prosecution event pertaining to the mark.																				
</description-text>																					
<date>	The <date> element is optional and will occur zero or one times between the <date> start and </date> end tags containing the EVENT DATE, an eight-position date in the format YYYYMMDD. The entry date indicates the date the entry became effective.																				
</date>																					
<number>	The <number> element is optional and will occur zero or one times between the <number> start and </number> end tags containing the EVENT SEQUENCE NUMBER, a three-position numeric field that will identify the sequence of records within the same type. Sequential number assigned to entry when filed in a data set.																				
</number>																					
</case-file-event-statement>																					
</case-file-event-statements>																					

PRIOR REGISTRATION APPLICATIONS SECTION	
XML Elements	Description
<prior-registration-applications>	The <prior-registration-applications> element is optional and occurs zero or one times between the <prior-registration-applications> start and </prior-registration-applications> end tags, which contains the equivalent of all TWTF/PRUS records. Each prior registration applications element will contain the optional other related in and prior registration application elements.
<other-related-in>	The <other-related-indicator> element is optional and occurs zero or more times between the <other-related-in> start and </other-related-in> end tags containing the AND OTHERS, a one-position alphabetic field. A “T” in this field would indicate that the words “and others” appears in conjunction with a list of prior registrations that are claimed as being related to this mark. An “F” would indicate that the statement is not present.
</other-related-in>	
<prior-registration-application>	The <prior-registration-application> element is optional and occurs zero or more times between the <prior-registration-application> start and </prior-registration-application> end tags, which contains the equivalent of a TWTF/PRUS record instance. Each prior registration application element will contain the optional relationship type and number elements.
<relationship-type>	The <relationship-type> element is optional and occurs zero or one times between the <relationship-type> start and </relationship-type> end tags containing the RECORD TYPE, a one-position alphabetic field that defines which of 4 types of record are being stored in the Prior Registration data set. 0 = Prior Registration 1 = Continuity Parent 2 = Continuity Child 3 = NonRegistration Document Control Number
</relationship-type>	
<number>	The <number> element is optional and occurs zero or one times between the <number> start and </number> end tags containing the REEL NUMBER, an eight-position alphanumeric field. This field contains a unique number identifying the applications or registrations to which the application or registration is related as a “child” or “parent” because the original application was divided during examination into two or more applications. Seven digits and a blank are used to enter a registration number. Eight digits are used to enter a serial number. When the record type contains a value of 1 or 2, this field will contain a serial number. An entry with a record type of 0 will contain a registration number. An entry with a record type of 3 will contain a unique control number assigned to the physical document which contains the non registration information.
</number>	
</prior-registration-application>	
</prior-registrations-applications>	

## FOREIGN APPLICATIONS SECTION

XML Elements	Description
<foreign-applications>	The <foreign-applications> element is optional and occurs zero or one times between the <foreign-applications> start and </foreign-applications> end tags containing the equivalent of all TWTF/FRGN records. Each foreign applications element will contain the optional foreign application elements.
<foreign-application>	The <foreign-application> element is optional and occurs zero or more times between the <foreign-application> start and </foreign-application> end tags containing the equivalent of a TWTF/FRGN record instance. Each foreign application element will contain the following optional elements.
<filing-date>	The <filing-date> element is optional and occurs zero or one times between the <filing-date> start and </filing-date> end tags containing the FOREIGN FILING DATE, an eight-position numeric in the format YYYYMMDD.
</filing-date>	
<registration-date>	The <registration-date> element is optional and occurs zero or one times between the <registration-date> start and </registration-date> end tags containing the FOREIGN REGISTRATION DATE, an eight-position numeric in the format YYYYMMDD.
</registration-date>	
<registration-expiration-date>	The <registration-expiration-date> element is optional and occurs zero or one times between the <registration-expiration-date> start and </registration-expiration-date> end tags containing the FOREIGN REGISTRATION EXPIRATION DATE, an eight-position numeric in the format YYYYMMDD.
</registration-expiration-date>	
<registration-renewal-date>	The <registration-renewal-date> element is optional and occurs zero or one times between the <registration-renewal-date> start and </registration-renewal-date> end tags containing the FOREIGN REGISTRATION RENEWAL DATE, an eight-position numeric in the format YYYYMMDD.
</registration-renewal-date>	
<registration-renewal-expiration-date>	The <registration-renewal-expiration-date> element is optional and occurs zero or one times between the <registration-renewal-expiration-date> start and </registration-renewal-expiration-date> end tags containing the FOREIGN RENEWAL REGISTRATION EXPIRATION DATE, an eight-position numeric expiration date for a foreign registration which has been renewed, in the format YYYYMMDD.
</registration-renewal-expiration-date>	
<entry-number>	The <entry-number> element is optional and occurs zero or one times between the <entry-number> start and </entry-number> end tags containing the ENTRY NUMBER, a three-position numeric entry number that will identify the sequence of each entry. FRGN records will be in descending sequence by entry number.
</entry-number>	
<application-number>	The <application-number> element is optional and occurs zero or one times between the <application-number> start and </application-number> end tags containing the FOREIGN APPLICATION NUMBER, a twelve-position alphanumeric, which pertains to Section 44(d).
</application-number>	
<country>	The <country> element is optional and occurs zero or one times between the <country> start and </country> end tags containing the FOREIGN COUNTRY CODE, a two or three-position alphanumeric, which identifies the country of origin. Refer to Table 2B Country Code List.
</country>	
<other>	The <other> element is optional and occurs zero or one times between the <other> start and </other> end tags containing a 3 position alphanumeric code identifying the geographic region which represents the owner's place of origin. Refer to Tables 2C Other Code List .
</other>	
<registration-number>	The <registration-number> element is optional and occurs zero or one times between the <registration-number> start and </registration-number> end tags containing the FOREIGN REGISTRATION NUMBER, a twelve-position alphanumeric.

## FOREIGN APPLICATIONS SECTION

XML Elements	Description
</registration-number>	
<renewal-number>	The <renewal-number> element is optional and occurs zero or one times between the <renewal-number> start and </renewal-number> end tags containing the FOREIGN RENEWAL REGISTRATION NUMBER, a twelve-position alphanumeric.
</renewal-number>	
<foreign-priority-claim-in>	The <foreign-priority-indicator> element is optional and occurs zero or one times between the <foreign-priority-in> start and </foreign-priority-in> end tags containing the FLAG FOREIGN PRIORITY CLAIMED, a one position alphabetic field. This field will contain “T” if foreign priority has been claimed. Otherwise, this field will contain an “F”
</foreign-priority-claim-in>	
</foreign-application>	
</foreign-applications>	

CLASSIFICATIONS SECTION	
XML Elements	Description
<classifications>	The <classifications> element is optional and occurs zero or one times between the <classifications> start and </classifications> end tags containing the equivalent of all TWTF/CLAS records. Each classifications element will contain the classification element.
<classification>	The <classification> element is optional and occurs zero or more times between the <classification> start and </classification> end tags containing the equivalent of a TWTF/CLAS record instance. Each classification element will contain the following optional elements.
<international-code-total-no>	The <international-code-total-no> element is optional and occurs zero or one times between the start <international-code-total-no> and </international-code-total-no> end tags containing NUMBER OF INTERNATIONAL CLASS, a two-position numeric field. The contents of this field will indicate the number of International Codes that appear in the CLS-INTL (CI).
</international-code-total-no>	
<us-code-total-no>	The <us-code-total-no> element is optional and occurs zero or one times between the start <us-code-total-no> and </us-code-total-no> end tags containing NUMBER OF US CLASS, a two-position numeric field. The contents of this field will indicate the number of U.S. Classes that appear in the CLS-US (CUS).
</us-code-total-no>	
<international-code>	<p>The &lt;international-code&gt; element is optional and occurs zero or more times between the start &lt;international-code&gt; and &lt;/international-code&gt; end tags containing INTERNATIONAL CLASS CODE, a three-position alphanumeric field. The number of international codes will equal the content of the international-code-total-no element. Each occurrence of this field will be as follows:</p> <p>Trademarks and Service Marks – A three-position numeric field with leading zeros. (Possible values are 001 through 0034 for Goods and 035 through 042 for Services).</p> <p>Certification Marks – A three-position alphabetic field. (Possible values are “A” and “B”).</p> <p>Collective Membership Marks – A three-position numeric field. (Possible value = 200).</p>
</international-code>	
<us-code>	<p>The &lt;us-code&gt; element is optional and occurs zero or more times between the start &lt;us-code&gt; and &lt;/us-code&gt; end tags containing US CLASS CODE, a three-position alphanumeric field. The number of US codes will equal the content of the us-code-total-no element. Each occurrence of this field would be as follows:</p> <p>Trademarks and Service Marks – A three-position numeric field (Possible value are 001 through 052 for Goods and 100 through 107 for Services).</p> <p>Certification Marks – A three-position alphabetic field (Possible values are “A” and “B”).</p> <p>Collective Membership Marks – A three-position numeric field. (Possible value = 200).</p>
</us-code>

<status-date>	The <status-date> element is optional and occurs zero or one times between the start <status-date> and </status-date> end tags containing STATUS DATE, an eight-position date in the format YYYYMMDD. This date is the date on which current class status was reported.																														
</status-date>																															
<first-use-anywhere-date>	The <first-use-anywhere-date> element is optional and occurs zero or one times between the start <first-use-anywhere-date> and </first-use-anywhere-date> end tags containing DATE MARK FIRST USED ANYWHERE, an eight-position date in the format YYYYMMDD. If the month and/or day do not appear in the source document, zeros will appear in that portion of this field.																														
</first-use-anywhere-date>																															
<first-use-in-commerce-date>	The <first-use-in-commerce-date> element is optional and occurs zero or one times between the start <first-use-in-commerce-date> and </first-use-in-commerce-date> end tags containing DATE MARK FIRST USED IN COMMERCE, an eight-position date in the format YYYYMMDD, which is regulated by Congress. <b>NOTE:</b> If the month and/or day do not appear in the source document, zeros will appear in that portion of this field.																														
</first-use-in-commerce-date>																															
<primary-code>	The <primary-code> element is optional and occurs zero or one times between the start <primary-code> and </primary-code> end tags containing PRIMARY CLASS CODE, a three-position alphanumeric field. <b>NOTE:</b> If the filing date of the application is on or after September 1, 1973 (Series Code 73), this field will contain an International Class (CLS-INTL). If the filing date is prior to September 1, 1973 this field will contain a U.S. Class (CLS-US).																														
</primary-code>																															
</classifications>																															

CORRESPONDENT SECTION	
XML Elements	Description
<correspondent>	The <correspondent> element is optional and occurs zero or one times between the < correspondent > start and </ correspondent > end tags, which contains the address information for the correspondent of record.
<address-1>	The <address-1> element is optional and occurs zero or one times between the <address-1> start and </address-1> end tags and contains the first line of Address Information.
</address-1>	
<address-2>	The <address-2> element is optional and occurs zero or one times between the <address-2> start and </address-2> end tags and contains the second line of Address Information.
</address-2>	
<address-3>	The <address-3> element is optional and occurs zero or one times between the <address-3> start and </address-3> end tags and contains the third line of Address Information.
</address-3>	
<address-4>	The <address-4> element is optional and occurs zero or one times between the <address-4> start and </address-4> end tags and contains the fourth line of Address Information.
</address-4>	
<address-5>	The <address-5> element is optional and occurs zero or one times between the <address-5> start and </address-5> end tags and contains the fifth line of Address Information.
</address-5>	
</correspondent>	

CASE FILE OWNERS SECTION	
XML Elements	Description
<case-file-owners>	The <case-file-owners> element is optional and occurs zero or one times between the <case-file-owners> start and </case-file-owners> end tags, which contains the equivalent of all TWTF/OWNR-OWNX records. Each case file owners element will contain the optional case file owner element.
<case-file-owner>	The <case-file-owner> element is optional and occurs zero or one times between the <case-file-owner> start and </case-file-owner> end tags, which contains the equivalent of a TWTF/OWNR-OWNX record instance. Each case file owner element will contain the following optional elements.
<entry-number>	The <entry-number> element is optional and occurs zero or one times between the <entry-number> start and </entry-number> end tags, which contains the ENTRY NUMBER, a two-position entry number, that will identify the sequence of Case File Owner record(s) within the same Party-Type.
</entry-number>	

<party-type>

The <party-type> element is optional and occurs zero or one times between the <party-type> start and </party-type> end tags and contains PARTY TYPE, a two-position numeric Owner Code, as described below.

**Trademark records that have NOT had the ownership information modified on or after November 2, 2003.**

<nationality>	The <nationality> element is optional and is comprised of either the State or Country element identifying the Place of Origin. Occurs zero or one times between the <nationality> start and </nationality> end tags and contains the CITIZENSHIP value, a two or three-position alphanumeric field. The content of this field will be the State/Country/Other code of the applicant/assignee/registrant citizenship. The state, territories and military states will appear as a two-position alphanumeric code. (Refer to Table 2A State Code List.) The country will appear as a two position alphanumeric code representing the place of origin. (Refer to Table 2B Country Code List). When the data is represented by a three position alphanumeric code, it either represents a geographic region or Government Agency. (Refer to Table 2C Other Code List. (Note: Government agencies may also be represented by a two position alphanumeric code and are listed in Table 2C Other Code List.)
<state>	The <state> element is optional and occurs zero or one times between the <state> start and </state> end tags containing the STATE NAME, a two-position alphanumeric, which identifies the place of origin. Refer to Table 2A State Code List.
</state>	
<country>	The <country> element is optional and occurs zero or one times between the <country> start and </country> end tags containing the FOREIGN COUNTRY CODE, a two or three-position alphanumeric, which identifies the place of origin. Refer to Tables 2B Country Code List and 2C Other Code List. (Note: Government agencies may also be represented by a tow position alphanumeric code and are listed in Table 2C Other Code List.)
</country>	
<other>	The <other> element is optional and occurs zero or one times between the <other> start and </other> end tags containing a 3 position alphanumeric code identifying the geographic region or government agency which represents the owner's place of origin. Refer to Tables 2C Other Code List . (Note: Government agencies/Military States are found in table 2A State Code List, this list also contains Government agencies/Military States that are also represented by a 2 position code.)
</other>	
</nationality>	

<legal-entity-type-code>	<p>The &lt;legal-entity-type-code&gt; element is optional and occurs zero or one times between the &lt;legal-entity-type-code&gt; start and &lt;/legal-entity-type-code&gt; end tags and contains the ENTITY TYPE, a two-position numeric field, as described below. This field is not relevant for records with a party type of 70.</p> <table> <tr> <th><u>Code</u></th><th><u>Description</u></th></tr> <tr><td>01</td><td>Individual</td></tr> <tr><td>02</td><td>Partnership</td></tr> <tr><td>03</td><td>Corporation</td></tr> <tr><td>04</td><td>Joint Ownership</td></tr> <tr><td>05</td><td>Joint Venture</td></tr> <tr><td>06</td><td>Incorporated Association</td></tr> <tr><td>07</td><td>Unincorporated Association</td></tr> <tr><td>08</td><td>Trustee</td></tr> <tr><td>09</td><td>Joint Stock Company</td></tr> <tr><td>10</td><td>Limited Liability Joint Stock Company (Ltd Liab Jt St Co)</td></tr> <tr><td>11</td><td>Company</td></tr> <tr><td>12</td><td>Foundation</td></tr> <tr><td>13</td><td>Limited Partnership</td></tr> <tr><td>14</td><td>State Agency</td></tr> <tr><td>15</td><td>Federal Agency</td></tr> <tr><td>16</td><td>Limited Liability Company</td></tr> <tr><td>17</td><td>Trust</td></tr> <tr><td>18</td><td>Estate</td></tr> <tr><td>19</td><td>Sole Proprietorship</td></tr> <tr><td>98</td><td>Unknown</td></tr> <tr><td>99</td><td>Other (Indicates Entity-Statement should appear).</td></tr> </table>	<u>Code</u>	<u>Description</u>	01	Individual	02	Partnership	03	Corporation	04	Joint Ownership	05	Joint Venture	06	Incorporated Association	07	Unincorporated Association	08	Trustee	09	Joint Stock Company	10	Limited Liability Joint Stock Company (Ltd Liab Jt St Co)	11	Company	12	Foundation	13	Limited Partnership	14	State Agency	15	Federal Agency	16	Limited Liability Company	17	Trust	18	Estate	19	Sole Proprietorship	98	Unknown	99	Other (Indicates Entity-Statement should appear).

</legal-entity-type-code>																																													
<entity-statement>	The <entity-statement> element is optional and occurs zero or one times between the <entity-statement> start and </entity-statement> end tags and contains an Entity Statement for an owner.																																												
</entity-statement>	.																																												
<party-name>	The <party-name> element is optional and occurs zero or one times between the <party-name> start and </party-name> end tags, which contains the complete party name within the Owner Information for the party type identified.																																												
</party-name>																																													
<address-1>	The <address-1> element is optional and occurs zero or one times between the <address-1> start and </address-1> end tags and contains ADDRESS1, the first 40 characters of the internal address within the Address Information.																																												
</address-1>																																													
<address-2>	The <address-2> element is optional and occurs zero or one times between the <address-2> start and </address-2> end tags and contains the ADDRESS2, the first 40 characters of the street address within the Address Information.																																												
</address-2>																																													
<city>	The <city> element is optional and occurs zero or one times between the <city> start and </city> end tags and contains the CITY/OTHER FOREIGN DESIGNATION, a 40-position alphanumeric field containing the city or foreign designation of an address.																																												
</city>																																													

<state>	The <state> element is optional and occurs zero or one times between the <state> start and </state> end tags, and contains the STATE CODE, a two-position alphabetic field containing the State code within the Address Information. . For two-position codes, see Table 2B Country Code List and for three-position codes see Table 2B State Code List. (Note: Government agencies may also be represented by a two position alphanumeric code and are also listed in Table 2A State Code List.)
</state>	
<country>	The <country> element is optional and occurs zero or one times between the <country> start and </country> end tags and contains the COUNTRY CODE, a two position alphabetic field containing the Country code within the Address Information.
</country>	
<other>	The <other> element is optional and occurs zero or one times between the <other> start and </other> end tags containing a 3 position alphanumeric code identifying the geographic region which represents the owner's place of origin. Refer to Tables 2C Other Code List .
</other>	
<postcode>	The <postcode> element is optional and occurs zero or one times between the <postcode> start and </postcode> end tags, and contains the U.S. Postal ZIP CODE or a foreign country's postal identification, A one to fifteen-position alphanumeric field
</postcode>	
<dba-aka-text>	The <dba-aka-text> element is optional and occurs zero or one times between the <dba-aka-text> start and </dba-aka-text> end tags and contains the Doing Business As (DBA), Also Known As (AKA) or Trading As (TA) Statement for an owner. When present an owner may have one or more of the 3 types of statements.
</dba-aka-text>	
<composed-of-statement>	The <composed-of-statement> element is optional and occurs zero or one times between the <composed-of-statement> start and </composed-of-statement> end tags, which contains the COMPOSED OF STATEMENT for an owner..
</composed-of-statement>	
<name-change-explanation>	The <name-change-explanation> element is optional and occurs zero or more times between the <name-change-explanation> start and </name-change-explanation> end tags and contains the ASSIGNMENT/NAME CHANGE Text record for this mark. Positions 1-2 will contain NC for Name Change. Positions 3-4 = PARTY-TYPE or 99. If positions 3-4 contain 99 then 5-6 will also contain 99, otherwise positions 5-6 will contain zeros. When positions 3-6 contain 9999, the statement refers to an assignment/name change description that may transcend party types. This special entry is only created for the purpose of constructing the Official Gazette.
</name-change-explanation>	
</case-file-owner>	
</case-file-owners>	

DESIGN SEARCHES SECTION	
XML Elements	Description
<design-searches>	The <design-searches> element is optional and occurs zero or one times between the <design-searches> start and </design-searches> end tags, which contains the equivalent of all TWTF/DSGN records. Each design searches element will contain the optional design search element.
<design-search>	The <design-search> element is optional and occurs zero or more times between the <design-search> start and </design-search> end tags, which contains the equivalent of a TWTF/DSGN record instance. Each design search element will contain the optional code element
<code>	<p>The &lt;code&gt; element is optional and occurs zero or one times between the &lt;code&gt; start and &lt;/code&gt; end tags and contains the DESIGN SEARCH CODE, a six-position numeric field describing Design Search Code Classifications. These codes are applicable to marks containing all illustration drawing or design (mark Drawing Code 2) or an illustration drawing or design which also includes word(s)/letter(s)/numbers(s) (Mark Drawing Code 3). The 1<sup>st</sup> two positions contain the category. The 3<sup>rd</sup> and 4<sup>th</sup> positions contain the division. The 5<sup>th</sup> and 6<sup>th</sup> positions contain the section. This field must appear at least one time for each DSGN record, and may appear up to 48 times per record.</p> <p>The PTO Design Search Code Manual describes the design search codes.</p>
</code>	
</design-search>	
</design-searches>	

## INTERNATIONAL REGISTRATION SECTION

XML Elements	Description
<international-registration>	The <international-registration> element is optional and occurs zero or one times between the start tag <international-registration> and end tag </international-registration> which identifies the INTERNATIONAL REGISTRATION record. Each international registration element will contain the following optional elements. <b>NOTE:</b> Any of the following elements that do not have the required date will contain zeros.
<international-registration-number>	The <international-registration-number> element is mandatory and occurs one time between the start tag <international-registration-number> and end tag </international-registration-number> containing the INTERNATIONAL REGISTRATION NUMBER, a maximum ten-position alphanumeric field. This number is assigned by the International Bureau.
</international-registration-number>	
<international-registration-date>	The <international-registration-date> element is mandatory and will occur one time between the start tag <international-registration-date> and end tag </international-registration-date> containing the DATE the INTERNATIONAL REGISTRATION was registered by the International Bureau. This is an 8-position numeric date in the format YYYYMMDD.
</international-registration-date>	
<international-publication-date>	The <international-publication-date> element is mandatory and will occur one time between the start tag <international-publication-date> and end tag </international-publication-date> containing the INTERNATIONAL BUREAU PUBLICATION DATE. This is the date the International Bureau published the international registration, an 8-position numeric date in the format YYYYMMDD.
</international-publication-date>	
<international-renewal-date>	The <international-renewal-date> element is mandatory and will occur one time between the start tag <international-renewal-date> and end tag </international-renewal-date> containing the INTERNATIONAL BUREAU REGISTRATION RENEWAL DATE. This is the date by which the International Registration must be renewed, an 8-position numeric date in the format YYYYMMDD.
</international-renewal-date>	
<auto-protection-date>	The <auto-protection-date> element is mandatory and will occur one time between the start tag <auto-protection-date> and end tag </auto-protection-date> containing the AUTO PROTECTION DATE. This is the date the US application will automatically be assigned a US registration number unless the US has issued a First Refusal Notification to the International Bureau – see first-refusal-in), an 8-position numeric date in the format YYYYMMDD.
</auto-protection-date>	
<international-death-date>	The <international-death-date> element is optional and occurs zero or one times between the start tag <international-death-date> and end tag </international-death-date> containing the INTERNATIONAL DEATH DATE. This is the date on which the International Registration expired, an 8-position numeric date in the format YYYYMMDD.
</international-death-date>	

## INTERNATIONAL REGISTRATION SECTION

XML Elements	Description		
<international-status-code>	The <international-status-code> element is mandatory and will occur one time between the start tag <international-status-code> and end tag </international-status-code> containing the INTERNATIONAL REGISTRATION STATUS CODE. The international status code identifies the status reported by the International Bureau and is a three-position numeric field.		
	RI Status	Literal	Situation
	100	IR cancelled as result of change in IR number	Dead as a Result of Change in IR number caused by Death/Birth
	101	IR cancelled	Dead as a result of Total Cancellation
	102	Death of IR	Dead as a Result of Non-Renewal, Renunciation or Cancellation by Holder of International Registration
	001	Request for extension of protection established	
</international-status-code>			
<international-status-date>	The <international-status-date> element is mandatory and will occur one time between the start tag <international-status-date> and end tag </international-status-date> containing the INTERNATIONAL REGISTRATION STATUS DATE. This is the effective date of the International Registration status code, an 8-position numeric date in the format YYYYMMDD.		
</international-status-date>			
<priority-claimed-in>	The <priority-claimed-in> element is mandatory and will occur one time between the start tag <priority-claimed-in> and end tag </priority-claimed-in> containing the INTERNATIONAL REGISTRATION FLAG PRIORITY CLAIMED. A one-position alphabetic field containing a “T” or “F” value. A “T” indicates the International Registration has claimed priority; a “F” indicates the International Registration has not claimed priority.		
</priority-claimed-in>			
<priority-claimed-date>	The <priority-claimed-date> element is optional and occurs zero or one times between the start tag <priority-claimed-date> and end tag </priority-claimed-date> containing the INTERNATIONAL REGISTRATION PRIORITY CLAIMED DATE. This is the date the International Registration claimed Priority, an 8-position numeric date in the format YYYYMMDD.		
</priority-claimed-date>			
<first-refusal-in>	The <first-refusal-in> element is mandatory and will occur one time between the start tag <first-refusal-in> and end tag </first-refusal-in> containing the FIRST FLAG REFUSAL status. A one-position alphabetic field a “T” or “F” value. A “T” indicates the US has issued a Notice of First Refusal to the International Bureau; a “F” indicates the US has not issued a Notice of First Refusal to the International Bureau.		
</first-refusal-in>			
</international-registration>			
<notification-date>	The <notification-date> element is optional and occurs zero or one times between the start tag <notification-date-uspto> and end tag </notification-date> and contains an 8-position numeric date in the format YYYYMMDD. This is the date on which the filing was received in the United States Patent and Trademark Office from the International Bureau.		
</notification-date>			

MADRID INTERNATIONAL FILING REQUESTS																											
XML Elements	Description																										
<madrid-international-filing-record>	The <international-registration> element is optional and occurs zero or one times between the start tag <international-registration> and end tag </international-registration> which identifies the INTERNATIONAL REGISTRATION record. Each international registration element will contain the following optional elements. <b>NOTE:</b> Any of the following elements that do not have the required date will contain zeros.																										
<madrid-international-filing-record>																											
<reference-number>	The <reference-number> element is optional and occurs zero or one times between the start tag <reference-date> and end tag </reference-date> containing a unique numeric number assigned by the USPTO to the international filing request. Used for tracking purposes.																										
</reference-number>																											
<original-filing-date-uspto>	The <original-filing-date-uspto> element is optional and occurs zero or one times between the start tag <original-filing-date-uspto > and end tag </original-filing-date-uspto > containing the DATE ON WHICH THE INTERNATIONAL FILING REQUEST WAS. RECEIVED BY THE USPTO. An 8-position numeric date in the format YYYYMMDD.																										
</original-filing-date-uspto>

MADRID INTERNATIONAL FILING REQUESTS	
XML Elements	Description
<international-status-date>	The <international-status-date> element is optional and will occur zero or one time between the start tag <international-status-date> and end tag </international-status-date> containing the INTERNATIONAL REGISTRATION STATUS DATE. This is the effective date of the International Registration status code, an 8-position numeric date in the format YYYYMMDD.
</international-status-date>	
<irregularity-reply-by-date>	The <irregularity-reply-by-date> element is mandatory and will occur one time between the start tag <irregularity-reply-by-date> > and end tag </irregularity-reply-by-date> containing the DATE SET BY THE INTERNATIONAL BUREAU FOR RESPONSE TO NOTICE OF IRREGULARITY. This is the date the International Bureau has determined a response is due, an 8-position numeric date in the format YYYYMMDD.
</irregularity-reply-by-date>	
<international-renewal-date>	The <international-renewal-date> element is optional and will occur zero or one time between the start tag <international-renewal-date> and end tag </international-renewal-date> containing the INTERNATIONAL REGISTRATION RENEWAL DATE. This is the date by which the International Registration must be renewed, an 8-position numeric date in the format YYYYMMDD.
</international-renewal-date>	
<madrid-history-events>	The <madrid-history-events> element is optional and occurs zero or one times between the <madrid-history-events> start and </madrid-history-event-s> end tags, which contains a history of all events (submitted to the USPTO) applied against the international filing. Contains the <madrid-history-event> element.
<madrid-history-event>	The <madrid-history-event-statements> element is occurs one or more times between the <madrid-history-event> start and </madrid-history-event> end tags, which contain a specific description for a single transaction applied against the international filing. This element is comprised of the code, description-text, date and number elements. Events will be listed in ascending date order and assigned a sequential number during extraction process.
<code>	The <code> element is optional and will occur zero or one times between the <code> start and </code> end tags containing the EVENT CODE, an alphanumeric field that represents an event in the prosecution of the Madrid international filing request (paper entered, communications, petitions, etc.) For a list of values, please refer to Table 6 – Madrid Processing History Event Code List
</code>	
<description-text>	The <description-text> element is optional and will occur zero or one times between the <description-text> start and </description-text> end tags containing the EVENT DESCRIPTION, a sixty-five position character field, which is the description of the prosecution event pertaining to the mark
</description-text>	
<date>	The <date> element is optional and will occur zero or one times between the <date> start and </date> end tags containing the EVENT DATE, an eight-position date in the format YYYYMMDD. The entry date indicates the date the entry became effective.
</date>	
<entry-number>	The <entry-number> element is optional and will occur zero or one times between the <entry-number> start and </entry-number> end tags containing the a sequential number, a three-position numeric field that will identify the sequence of records within the same type. Sequential number assigned to entry when event extracted from table
</entry-number>	.

## Table 2A State Code List

*This list contains all US states and territories. A 2 position code is also used by the USPTO to represent various Government Agencies such as U.S. Army, U.S. Navy, NASA and Military States. Some government agencies are also represented by 3 position codes and are defined in Table 2C Other Code List.*

## Table 2C Other Code List (3 digit code)

*If the third character is a "C", the code is a geographic region of Canada. (e.g., ABC, PQC).*

*If the third character is a number, the code is a geographic region of the code that is in the first two positions (e.g., GB1, GB2, CN1, OM1).*

*If the third character is anything other than a "C" or a number it is used to represent a Government Agency.*

CODE	DESCRIPTION
ABC	ALBERTA
